

DID YOU KNOW?
ERK-18-20 & 25

Fan cooling and Venting applications.

For aesthetics and economy fan sized laser knockouts have been provided in the top of the smaller size ERK enclosures 1820, 1825, 2720 & 2725 Series.

This feature enables the consumer to cool equipment using standard 4-1/2" fans or venting configurations as needed.

SPECIAL NOTE

For customer convenience in venting applications we have supplied 2 vented grills. These grills are to be used for the sole purpose of VENTING ONLY.

The use of these grills in conjunction with fans will extremely limit airflow and is not recommended.
