Description:

Made from heavy duty 14-gauge steel, this non-proprietary, outdoor-rated, corner housing gives security installers the flexibility to mount and protect one or more access control devices on a single pedestal head or wall.

This secure card reader housing is specifically designed for security professionals and incorporate features such as an EPDM rubber seal, stainless steel hinge, sufficient backbox space, a privacy/weather shroud, convenient knockouts, and a polyester powder coat finish with UV inhibitor. Custom cutouts on the door panels to match your devices can be requested - additional costs and lead times may apply.

These are most often used at pedestrian or vehicular access points in parking facilities or gated entries. Works with all kinds of card readers, intercoms, cameras, keypads, and other access control devices.
